WORK EXPERIENCE

Teacher Assistant   Oct 2020 – Present
Trilogy, New York, NY

- Help teach students the MERN (Mongoose, Express, React, Node) stack by leading activities
- Create seamless class sessions by creating breakout rooms, lead breakout rooms, time tracking, and taking over host responsibilities on zoom
- Ensure student success by following up on any missed assignments as well as weekly health checks
- Conduct mock code reviews with students using their homework submissions and projects

Full Stack Developer   Oct 2019 – June 2021
Popshop, New York, NY

- Successfully utilized jQuery, JavaScript, HTML, CSS to create a Mobile Responsive Frontend for users and Django, Python to create a reliable backend with minimal errors
- Improved site reliability by updating older code which would cause bugs and writing tests for each new feature implemented using Selenium
- Rebuilt and improved the checkout process from start to finish by first updating the booking form by adding more payment options, making the price calculation fault tolerant, adding in Stripe ACH as a form of payment, and created tests for each new feature

Technical Manager   Sept 2018 – May 2021
CEC Entertainment, Bronx, NY

- Increased sales and customer retention by ensuring games worked 100% and managed a team of 12 game room attendants to help meet customers' needs
- Performed in-house repairs of machines as well as performed preventative maintenance on all machines BOH and FOH
- Kept track of budgets, Inventory, and repairs to keep the game room in good shape for customers

PROJECT

Piriji – Founder / Full Stack Developer

A web and mobile app that allows users to find happy hours and bar info in NYC

Tech stack: Ruby on Rails, React, React Native, PostgreSQL, REST API
